

KEVIN ONYANGO

Systems & Network Support | Aspiring Cybersecurity Specialist | Django & Python Developer

Email: kevinonyangowanga@gmail.com | **Phone:** (+254) 797-369-609 | **Location:** Kakamega, Kenya

PROFESSIONAL SUMMARY

Driven IT Specialist with a multifaceted background in full-stack development, system administration, and network support. I bridge the gap between software engineering and security, leveraging expertise in **Python/Django** and **cybersecurity principles** to implement robust digital solutions. As a former Research Assistant and proven team leader, I excel at troubleshooting complex technical challenges while fostering educational innovation and organizational efficiency.

CORE COMPETENCIES

- **Development:** Django, Python, React.js
- **Networking & Security:** OSI & TCP/IP Models, Cybersecurity Fundamentals, Nmap, Burp Suite
- **Systems & Databases:** Linux (Fedora) & CLI, System Administration, MongoDB, PostgreSQL
- **Soft Skills:** Technical Leadership, Creative Problem-Solving, Strategic Communication

PROFESSIONAL EXPERIENCE

Butere County Hospital | Butere, Kenya

***IT Industrial Attachment** | 05/2026 – 08/2026*

- **Web Application Development:** Designed and built a responsive hospital web application, improving patient access to service directories and institutional announcements.
- **Network Infrastructure & Maintenance:** Terminated, tested, and routed Ethernet cabling (RJ45); installed, configured, and maintained switches, routers, and local department Wi-Fi access points to secure continuous connectivity.
- **IT Support & Helpdesk Services:** Provided day-to-day tier-1 and tier-2 IT support across hospital departments, resolving hardware, printer, OS, and software issues for administrative and medical staff.
- **Systems Administration & Preventative Maintenance:** Monitored system uptime, performed preventative diagnostic routines on workstation terminals, and assisted in safeguarding user access controls.

eMobilis Mobile Technology Institute | Westlands, Nairobi

Software Engineering Trainee (Python/Django) | 09/2025 – 12/2025

- **Advanced full-stack development skills** specializing in the Python/Django ecosystem.

Kaimosi Friends University (KAFU) | Vihiga, Kenya

Industrial Training (IT, Development & Systems Support) | 05/2025 – 07/2025

- **System Support & Troubleshooting:** Maintained campus IT infrastructure and performed hardware diagnostics, achieving **99% uptime** for critical student services.
- **Database Management:** Managed relational databases, focusing on data integrity and query optimization for university resource systems.
- **Network Infrastructure:** Monitored campus-wide Wi-Fi networks and managed server room hardware in collaboration with the IT department.

TECHNICAL ACHIEVEMENTS & STRENGTHS

- **Technical Leadership:** Demonstrated ability to lead development teams in high-pressure environments like hackathons, effectively translating complex requirements into technical tasks.
- **Award-Winning Problem Solving:** Contributed to a team that secured **2nd place** out of 50 in a university-wide hackathon.
- **Communication Excellence:** Improved comprehension of complex technical concepts by **40%** through presentations at university seminars for non-technical audiences.
- **System Maintenance:** Skilled in maintaining high system uptime within Linux environments (Fedora) through proactive hardware and software diagnostics.

EDUCATION

Bachelor of Science in Information Technology

Kaimosi Friends University (KAFU) | 2023 – *Present*

INTERESTS & PERSONAL PROJECTS

- **Cybersecurity:** Active participant in **Capture The Flag (CTF)** challenges to sharpen penetration testing and network security skills.
- **Network Infrastructure & WISP:** Researching the deployment and management of local Wi-Fi hotspots and Wireless Internet Service Providers (WISP).
- **Open Source:** Experimenting with Linux kernel/boot configurations and contributing to the Fedora ecosystem.
